

Complementary Cancer Care, INC hosts in-person activities in order to assist with mental health issues brought on by both cancer and the pandemic. However, we want to host these activities in the safest possible way and will only do so IF:

- All facilitators / assistants are free from COVID-19 symptoms for 10 consecutive days prior to event;
- There is good ventilation in the meeting room;
- Participants use masks and stay 6 feet apart when moving about indoors;
  - Additionally, we advise participants in *active cancer treatment* and those with *blood cancer* history to take additional precautions by remaining masked and by surrounding themselves with other participants who are fully vaccinated (including the third or booster vaccination); these recommendations are based on the Leukemia and Lymphoma Society's finding that some blood cancer patients will fail to make COVID-19 anti-spike antibodies even after the 3-shot mRNA vaccine series
  - Participants who are no longer in active treatment and have been fully vaccinated can remove masks when 6 feet apart in good ventilation/outdoors and when the facilitator has determined there are no immune-compromised participants

## COVID-19 POLICY: Participant's Agreement for In-Person Gatherings 1/10/22

I am aware that an inherent risk of exposure to COVID-19 exists in any public place where people are present. COVID-19 is an extremely contagious disease that can lead to severe illness and death.

Therefore, I will, to the best of my ability, practice proper physical distancing during my participation in Complementary Cancer Care activities, per recommendations by health department directives, as well as practice good hygiene (handwashing, use of hand sanitizer, wearing of a mask, etc.) and follow other health recommendations. Should I become ill, I promise to self-report the illness and contact Complementary Cancer Care to let them know of my condition. I will adhere to testing guidelines and work with my own primary care providers. Finally, if I am exposed to suspected to be exposed to COVID-19 I will self-quarantine and notify Complementary Cancer Care.

By participating in Complementary Cancer Care programs, I voluntarily assume all risks related to exposure to COVID-19. Complementary Cancer Care is not liable for any transmission / infection during the participation of our programs.

I attest to the following:

- I have not exhibited any symptoms related to COVID-19, i.e., fever, cough, sore throat, shortness of breath, shills, muscle pain, headache, new loss of taste or smell, fatigue, congestion or runny nose, nausea or vomiting, or diarrhea.
- I have not had any person-to-person contact with someone who has exhibited COVID-19 symptoms or who has been diagnosed with COVID-19 in the last 14 days.
- (If previously diagnosed with COVID-19) I have had no fever for at least 72 hours (3 full days of no fever without the use of medicine that reduces fevers); AND other symptoms have improved (for example, when cough or shortness of breath have improved); AND at least 10 days have passed since symptoms first appeared.
- I will abide by guidelines set in place by Complementary Cancer Care in regards to physical distancing, handwashing, face coverings, and all other COVID-19 prevention procedures throughout the time of my participation with their programs.

## COVID-19 POLICY: Complementary Cancer Care's Agreement 3/29/21

Complementary Cancer Care, INC hosts in-person activities in order to assist with mental health issues brought on by both cancer and the pandemic. However, we want to host these activities in the safest possible way and will only do so IF:

- The number of positive COVID-19 cases in Brevard County are declining for the 2 weeks prior to the event;
- All facilitators / assistants are free from COVID-19 symptoms for 10 consecutive days prior to event;
- There is good ventilation in the meeting room;
- High-touch surfaces (chairs, tables, doorknobs, toilets, etc.) are cleaned before and after event;
- Participants have hand sanitizer available to them before and after the event - either individual bottles or hands-free dispenser;
- Participants use masks when moving about; cancer survivors who are no longer in active treatment or those who have been fully vaccinated can remove masks when 6 feet apart in good ventilation, but those in active treatment need masks on at all times;
- Participants don't share supplies and any food service items used are disposable (participants can bring their own from home as long as they don't share);
- Gloves are available for participants who may want to use them;
- An on-site volunteer (other than the facilitator) is present to ensure the above happens because as people get more comfortable with each other (which we encourage) they forget to stay apart, wear masks, begin sharing supplies, etc. (which we discourage).

## COVID-19 POLICY: Participant's Agreement for In-Person Gatherings 3/29/21

I am aware that an inherent risk of exposure to COVID-19 exists in any public place where people are present. COVID-19 is an extremely contagious disease that can lead to severe illness and death.

Therefore, I will, to the best of my ability, practice proper social distancing while at home and during my participation in Complementary Cancer Care activities, recommended by health department directives, as well as practice good hygiene (handwashing, use of hand sanitizer, wearing of a mask, etc.) and follow other health recommendations. Should I become ill, I promise to self-report the illness and contact Complementary Cancer Care to let them know of my condition. I will adhere to testing guidelines and work with my own primary care providers. Finally, if I am exposed to suspected to be exposed to COVID-19 I will self-quarantine and notify Complementary Cancer Care.

By participating in Complementary Cancer Care programs, I voluntarily assume all risks related to exposure to COVID-19. Complementary Cancer Care is not liable for any transmission / infection during the participation of our programs.

I attest to the following:
